**2. Citations and explanations**

**see separate sheet**

1. The present application discloses a method for the phytoremediation of contaminated environment by use of transgenic plants expressing an enzyme having rhamnosyltransferase activity.
2. Claims 16, and 21-23 lack novelty (Article 33(2) PCT) over WO00/43490 (D1) or WO94/03591 (D2)

D1 discloses a gene encoding a polypeptide having rhamnosyltransferase activity and its use to transform plants (e.g. p. 19, l. 6-25). Particularly preferred plants are of the genus Citrus, but transformation of tobacco cells is also envisaged (p. 19, l. 4). The same objection could be based on D2, p. 12, l. 30-35, and claim 25.

3. It is questionable whether any enzyme having rhamnosyltransferase activity will be suitable to perform the present invention.
